

Precision Analytics GROUP

Precision Analytics Group (PAG) was founded in 2018 by Business Intelligence experts with experience serving a multitude of Fortune 100 companies. We are based out of Portland, OR and we will support clients across the United States and Canada.

These assignments produced diverse expertise:

- Nonprofits
- Public Sector
- Education
- Healthcare
- Construction

Analytics Consulting

PAG is committed to providing its clients with the highest quality of business analytics consulting by offering system design, data blending, reporting, and technical training.

Public Sector Experience

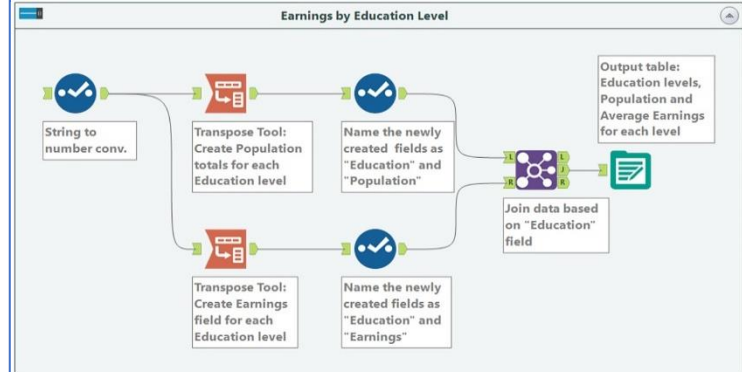

PAG has experience applying analytics to the War on Terror. We tracked terrorists' incidents and their impacts by capturing the dead, wounded, and hostage victims for each incident across the world. We were able to track the incidents themselves, but also who was responsible for those incidents as well as where they occurred. The combination of these data along with other data allowed us to develop reports for Congress to develop foreign policy initiatives to protect human life.

PAG is authorized to work in Federal, State, and City Government.

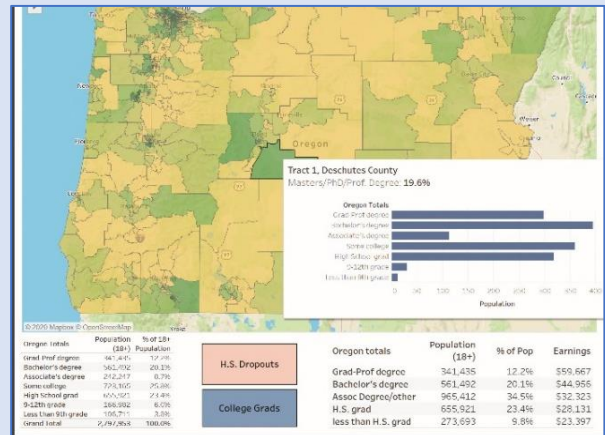

Expertise in Business Analytics Tools

PAG has deep experience with multitude of analytics tools. We are proud partners with Alteryx, a leader in self-service analytics, and Precisely, a leader that offers the industry's most complete portfolio of data integrity products.

PAG is adept in other business intelligence tools, such as Power BI, Tableau, and IBM Cognos.

Experts in merging Alteryx and Tableau

Some clients are thrilled with Alteryx's tools to create cleaned, reorganized and summarized data files. Others are focused on pouring their data into Tableau, and are frustrated by the severe limitations of Tableau Prep.

In the example above, the table of population and earnings by education level did not exist in the underlying U.S. Census data. PAG experts used Alteryx to transpose multiple Census fields to create the table and other dashboard parts.

As part of pre-sale and post-sale support, Precision Analytics Group can demonstrate how Alteryx is essential in preparing data for high impact dashboarding in Tableau.

PAG experts are certified by both Alteryx and Tableau.
